

The non-sterile powder-free nitrile examination gloves from PROVA are high-quality disposable gloves made of stable nitrile. Thanks to the specially developed material composition, it protects against chemical splashes, but at the same time offers a good tactile sensation and a secure grip. Thanks to the soft material, the glove lies comfortably on the skin and the 240 mm long cuff also protects the wrist. Products that are processed with the disposable gloves are also protected, as they are silicone-free and therefore also suitable for working with food.

Due to their excellent material properties, nitrile gloves are used in a wide variety of situations such as nursing activities, wound care, in highly infectious areas such as MRSA and noroviruses, household, kitchen etc. The close-fitting shaft with a solid rolled edge provides additional security against ingress of liquids.

The material is particularly elastic and tear-resistant, offers an optimal fit and a high degree of grip. The glove is ambidextrous.

High quality (dimensions, tear resistance and biocompatibility correspond to EN 455 1-4, test severity AQL 1.5).

Approved for the preparation and processing of all types of food (short-term direct contact). Protection against penetration by chemicals and microorganisms according to EN 374-1: 2016, type B (KPT) and EN 374-5: 2016 virus. PPE Cat III.

Colors blue, green, white and black. Glove length approx. 24 cm, content 100 pieces per package.

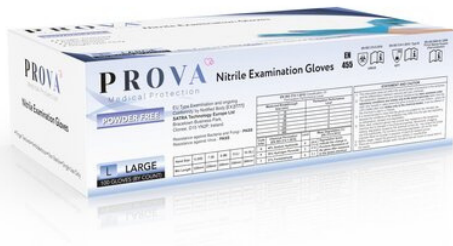

Prova Medical Protection Gloves are produced by **Top Glove** in Malaysia.

Top Glove is the world's largest producer of nitrile gloves and a high quality producer with headquarters in Malaysia.

Top Glove has been producing nitrile gloves since 199. With 22,000 employees and 800 production lines in 50 locations Top Glove produces 100 billion gloves a year.

Thus 26% of the worldwide market for nitrile gloves is produced by **Top Glove** and exported to 195 countries. Different types of gloves are produced under our private label and also as an OEM for many brands.
